

ENG 2 CF HD

Tripod, Heavy duty, Carbon Fiber

These tripods are top sellers for good reasons. The ENG 2 CF is extremely lightweight, solid and stable. Although the ENG 2 CF HD weighs just 4 kg / 8.8 lb, its completely dual tube design ensures it can safely and stably carry payloads of up to 95 kg / 209 lb even at its maximum height of 161 cm / 63.4". And with its folding handle, you can easily carry the tripod in a horizontal position.

Double extension tripods are ideal for a much wider variety of applications, due to their expanded height range, i.e. lower bottom and higher top positions. In addition, their transport length is even shorter. For extra stability, Sachtler offers heavy duty (HD) versions with larger tube diameters. With our quick clamping system, you can securely – and visibly – lock the tripod.

Technical Facts
