

Hot Pod® CF 10
Tripod, Carbon Fiber

Hot Pod® CF
The fastest tripod in the world

All that's needed to change the fluid head is a touch of the button – no tools are required! With its centering function, the Hot Pod's locking system simultaneously releases and locks all three legs. The pneumatic center column easily lifts loads up to 25 kg / 55 lb (Hot Pod® CF 14) to lens heights of over 2 m / 6.6 ft and has a factory set elevation force that is maintenance free. And if you need to move quickly, the Hot Pod® CF has both a handle and a strap for easy carrying.
