

DA 100 HD

Tripod, Heavy duty,
Aluminium

Dural aluminium (DA) 100 mm single extension tripods come in a variety of sizes from the tiny DA 100 K, with its mini spreader, to the DA 100 L, which has a maximum height of 142 cm / 55.9".

The DA 100 HD has a maximum load of 80 kg / 176 lb. A highly cost-effective alternative to carbon fiber tripods. Standard dural aluminium tripods also have a tube diameter of 16 mm / 0.63", while HD versions have a tube diameter of 22 mm / 0.87". Need to get down to a frog's perspective? The DA 100 K offers stability for extremely low shooting positions, because our 'baby' has its very own minispreader. And like all the others in its line, it also features the Sachtler rotary clamping system. You'll see and feel how securely your tripod is locked.
