

EFP 2 CF

Tripod, Carbon Fiber

Carbon fibers are an increasingly popular choice for tripod materials. Our fast-action clamps (as on EFP 2 CF) secure the legs in next to no time, and users can immediately see they are locked in place. Sachtler double extension carbon fiber tripods deliver the best of both worlds – lightweight operation for heavy-duty action.

EFP 2 – Stable, even in tight corners

The EFP 2 tripods are two-stage extendable and feature fast-action clamps. In addition to the already familiar ground spreader, an adjustable mid-level spreader for tripods with 150 mm bowls is available. EFP 2 tripods use twin tubes that stretch from the top right down to the bottom, which helps ensure unsurpassed stability.
