

OB 2000

Tripod, Heavy duty,
Aluminium

OB 2000 for OB and studio applications

The OB 2000 is the tripod for heavy cameras. The single stage, heavy duty, flat base tripod has a built-in stabilizer which can hold a hand crank column and lock it into place. Rotating rubber feet are built into the tripod legs. The built-in bubble and tripod leg scaling provide simple and precise leveling. The OB 2000 supports all common flat-base heads, including Mitchell video fittings, which do not require an adapter.
