

# PC/HDTV Tuner Box

Receiving your aerial/cable channels in  
HDTV/VGA quality

Operation Manual

## **Introduction**

Thank you for purchasing CSC-1200T. The product you have purchased has been carefully engineered and manufactured to give you dependable operation. Read this manual before operating this unit to become familiar with its features and obtain the performance that will bring you continued enjoyment for many years. Please retain this manual for future reference.

## **Precautions**

When using this product, basic safety precautions should always be followed to reduce the risk of fire and electric shock, including the following:

Read and understand all instructions marked on this product.

To prevent fire or shock hazard, do not expose this product to rain moisture.

Do not use near a bath tub, wash bowl, sink, or laundry tub; do not use in a wet basement or in a swimming pool.

To avoid electrical shock, do not open the case of this product.

Operate this product using only the power supply included with it or provided as an accessory. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.

Do not overload electrical outlets or extension cords as this can result in fire or electric shock.

The unit should be situated away from heat sources such as radiators, stoves, etc.

The unit should be situated so that its location or position does not interfere with its proper ventilation.

## **Features**

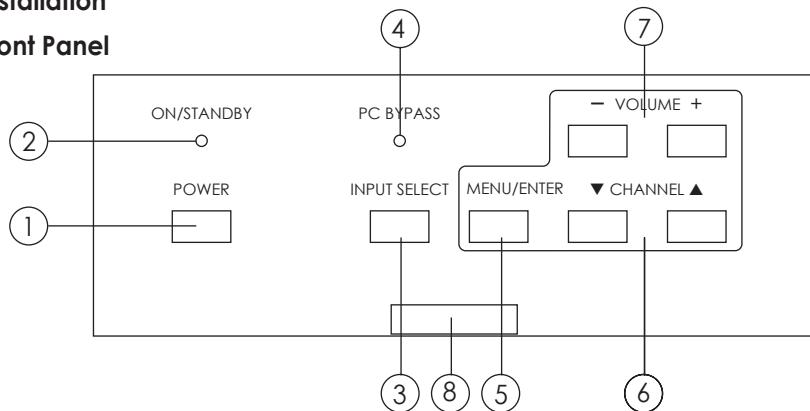

1. View VHF/UHF/Cable TV,DVD movie and other videos on your PC monitor, LCD projector or large screen HDTV or Plasma TV.
2. Accepts RF, S-Video, Composite video and VGA inputs.
3. Converts above inputs to 720x480 VGA or HDTV 480P/576P output for display on LCD monitor, plasma, or projection TV.
4. 50 to 60 Hz frame rate conversion ensures smooth display for PAL input (50 Hz).
5. Auto-scan programming and 181 channel memory.
6. Built-in adaptive film mode 3:2 pull-down provides clear and crisp de-interlacing of video originating from 24 fps film, such as DVD movies.
7. Supports 2:2 pull down for PAL mode video.
8. Vertical Temporal filter remove jaggy and other de-interlacing artifacts from normal video.
9. Y,Pb,Pr output for progressive scanning display.
10. Motion-adaptive interfiled de-interlacing.
11. OSD menu display for channel tuning and picture adjustment.
12. PC loop through allows for easy switch between video and PC input.
13. No software driver required. It suits all OS.
14. MTS stereo audio output.

## **Package Contents**

- CSC-1200T PC/HDTV Tuner Box.
- 15-pin D-Sub to D-Sub cable.
- Remote control.
- 2 RCA to 2 RCA Audio cable
- This instruction manual.
- RCA video cable.
- 2 x 3A 1.5V Battery, 1.2V 800mA power adaptor.

## Installation

### Front Panel

#### 1. Power button:

Press the button to turn unit on or standby.

#### 2. ON/STANDBY indicator:

When power jack is first plugged in the unit will enter into standby mode and the LED illuminates in red color.

When power button is pressed, the unit is turned on, and the LED illuminates in green color. The unit is then ready for operations.

When the unit is under standby mode, all control buttons will not function, only the PC input is looping through to the VGA output.

#### 3. Input selection:

Press the button repeatedly will toggle through four input sources available for your selection.

The sequence of selection by increasing the times of pressing the button is as bellow:

TV(RF)→ Composite Video→ S-Video →PC Bypass

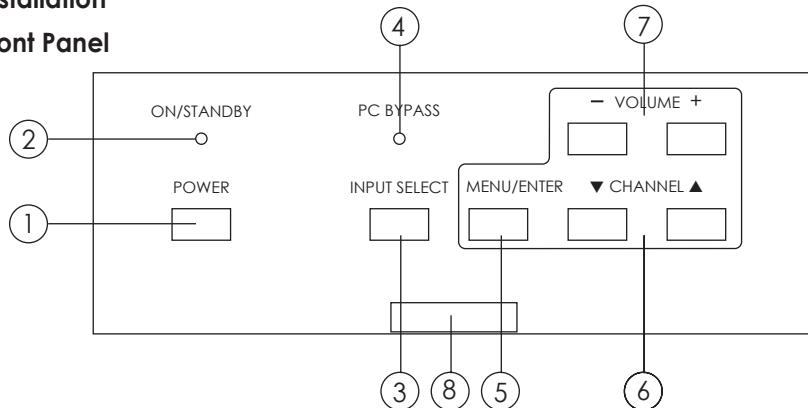

#### 4. PC Bypass LED:

The LED illuminates when PC source is selected as input and is bypassed to the output.

When the other three sources is selected this LED will not light however OSD will indicate input source on the screen. □

## Installation

### Front Panel

#### 5. MENU/ENTER:

Press the button to enter into OSD mode, or to confirm your selection on the highlight parameters.

#### 6. Channel ▲▼:

When not in OSD menu mode, press the button to increase(▲) or decrease (▼) the TV channel number.

When in OSD menu mode. Press the button to move up or down the highlight bar to your desired parameter.

#### 7. Volume - +:

When not in OSD menu mode. Press the button to increase (▲) or decrease (▼) audio volume.

When in OSD mode. Press the button to alter the value of your selected parameter.

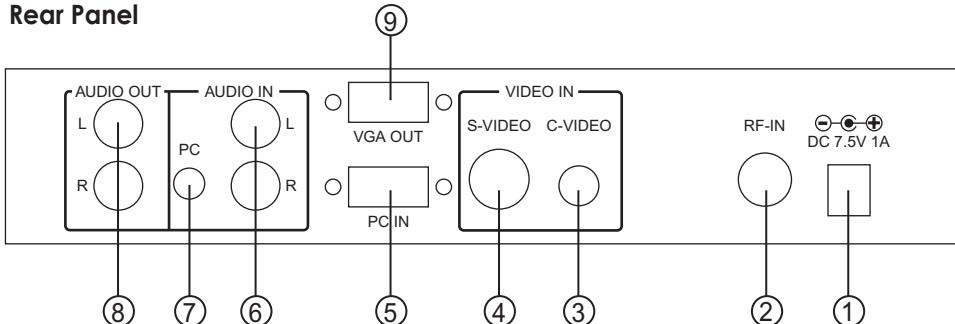

#### 8. Remote Control Sensor.

#### Note:

Press the ▲ and ▼buttons at the same time returns all picture adjustment to the factory preset values.

## Installation

### Rear Panel

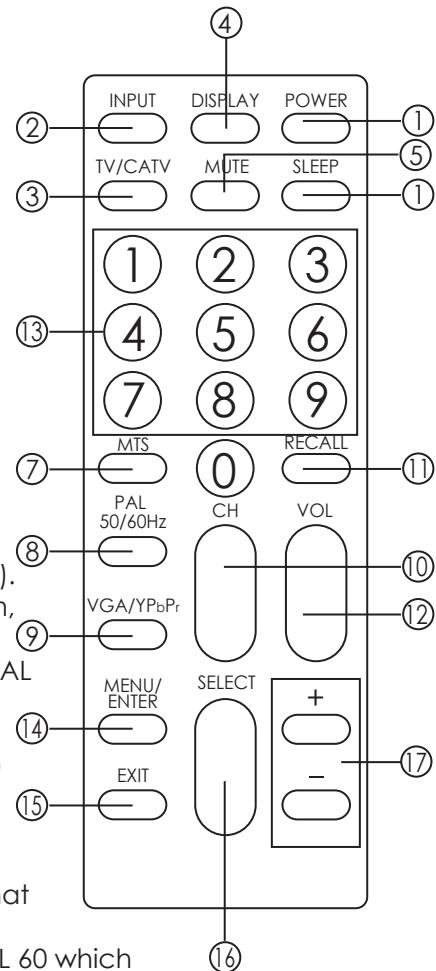

1. Power socket: 7.5V/1A DC input.
2. RF-IN: Terrestrial VHF/UHF Antenna input or CATV coaxial cable input.
3. C-Video input: Composite video input.
4. S-Video input: S-Video input.
5. PC-IN: 15-pin D-Sub PC VGA input.
6. Audio: Stereo audio input.
7. PC audio: 3.5mm PC audio input.
8. Audio out: Stereo audio output.
9. VGA out: 15-pin D-Sub VGA output.

## Installation

### Remote Control:

1. **Power:** Power ON/OFF button.
2. **Input:** Press the button repeatedly to select desired input source from TV, C-Video, S-Video and PC.
3. **TV/CATV:** Press the button to select aerial channel or cable channel.
4. **Display:** Press the button to turn on or off the indication of input source or channel number on the screen.
5. **Mute:** Press the button to mute the audio.
6. **Sleep:** Press the button to set the time for automatically turning off the machine (1~120 minutes).
7. **MTS:** Press the button to choose Stereo, SAP or Mono audio.(SAP: Second Audio Program; Mono: L+R/L+R; Stereo: L/R).
8. **PAL 50/60:** When video input is PAL system, depending on your selection the unit will either convert vertical frequency of PAL input from 50 Hz to 60 Hz or just let 50 Hz pass through.  
It is recommended that you select PAL 50 (factory default) which simply bypass the vertical frequency to the output to obtain the best picture quality.  
However in case of some LCD monitors that can not accept 50 Hz vertical frequency, you have to press the button to select PAL 60 which converts 50 Hz input to 60 Hz so that LCD monitor can lock into the frequency and display the picture.
9. **VGA/YPbPr:** Press the button to select VGA or YPbPr as output mode.
10. **CH +,-:** Press the button to increase / decrease channel number.
11. **Recall:** Press the button to recall last channel.
12. **VOL +,-:** Press the button to increase/ decrease audio volume.
13. **0~9:** Press the number to select desired TV/CATV channel directly.
14. **Menu/Enter:** Press the button to enter into OSD menu or to confirm your selection of the desired parameter.
15. **Exit:** To exit OSD.
16. **Select +,-:** Press the button to move up or down the highlight bar of selected item.
17. **+,-:** Press the button to adjust the setting value of the selected parameter.

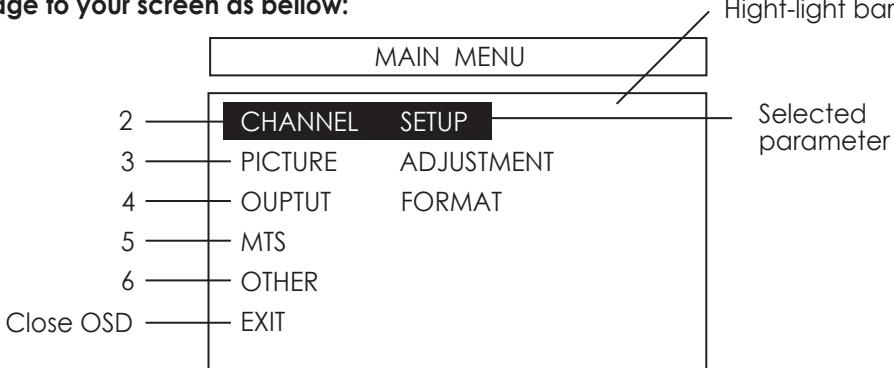

## Installation

### Power up the unit:

1. Plug the power jack into the power socket on the back of the unit, the power LED will illuminate in red color(Standby mode).
2. Press the power button, power LED will turn into green light.(operation mode)
3. Press the power button again will return to standby mode.
4. When the unit first powered up the default input to the unit is TV(RF) input. When you changed input source and later power down the unit the last input source you selected will be memorized by the unit. When you re-power the unit the memorized input will be recalled as input source.

### OSD operation:

1. After power- on the unit. Press the Menu button will bring up the main menu page to your screen as bellow:

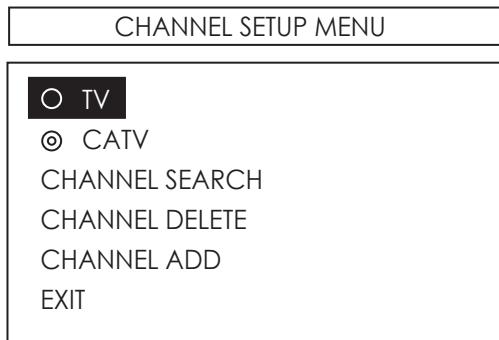

Use channel ▲▼ to move up or move down high-light bar to your desired parameter.  
Press MENU/ENTER to confirm your selection.

To adjust the setting value of your selected parameter, press volume + to increase the value. Press volume - to decrease the value.

## **Installation**

### **OSD operation:**
