II. Preparing and Running the Software

1. Copy all the files to PC.
2. Double click "prompter.exe" to run the program.
3 After started, you can open an existed TXT file, or
   if click Edit(E) to enter into Editor, then type telecasting words into the editing
   area, click Ok to save and exit editor.
4. Click left button of mouse to run.
5. Left button of mouse or space bar controls start or stop scrolling of text.
   Right button of mouse controls quickly forward or backward and he mouse
   wheel is used to adjust the scrolling speed.
   The program also can be controlled by remote handle which is included in
   the equipment pack. The remote handle has same function as mouse. The
   telecaster can use all these three ways to do the operation.

Note:
● Don't forget to plug in software dongles into PC USB.
● Please set two screens to same attributes such as resolution, color (32bit)
   and so on.
● Before use, please read "Help" carefully to know how to use software
   properly.
