

Speed Lock® 75 CF Tripod, Carbon Fiber

The Speed Lock® CF is the fastest two stage tripod in the world! Simply release the three easy to reach clamps and the Speed Lock® CF is ready for action. This extremely sturdy and twist-resistant carbon fiber tripod ensures that you're already shooting while the others are still setting up.

It takes just three quick movements and the Speed Lock® CF is ready for action – and users don't even have to bend over! The patented clamping system lets you adjust the tripod smoothly and safely, even with a camera mounted. The Speed Lock® CF's carbon fiber construction ensures minimal load-free weight, and increases stability and twist resistance. On top of that, the clamping connection forms a third tube to further increase stability. The ergonomically shaped, high-tech clamps have a rounded design which ensures that cables slide off without catching. In addition, you can tell at a glance whether the legs are clamped into position.

Technical Facts

Weight	2 kg / 4.4 lbs
Payload	20 kg / 44 lbs
Height with spreader	34 - 147 cm / 13.4 - 57.9 in
Height with mid-level spreader	60 - 144 cm / 23.6 - 56.7 in
